## FITA / Microsoft Software Scheme Overview

The **Foundation for Information Technology Accessibility** (FITA) is the principal advocate and coordinator for making information communications technology (ICT) accessible for persons with disability, in the Maltese islands.

As part of the Memorandum of Understanding (MOU) signed with the Malta Information Technology Agency (MITA) and the National Commission Disabled Persons (KNPD), FITA is collaborating with Microsoft Malta in order to bring leading MS Software within easier reach of persons with disability. In ensuring that such steps are taken to minimise the digital divide, we empower persons with disability to contribute productively to society and the economy.
